Please be advised that the City of Los Angeles Solid Waste Local Enforcement Agency (LEA) received and approved a Registration Permit Application for the First Stop Recycling. The LEA is certified by the California Department of Resources Recycling and Recovery (CalRecycle) to enforce state laws and regulations at solid waste sites within the City of Los Angeles, including all transfer stations.

**Description of Project and LEA's Determination**

The First Stop Recycling Transfer Station is an approximately 25,000 square feet medium volume transfer station located at 12207 Branford Street in Sun Valley, California.

On April 29, 2021, the LEA received from First Stop Recycling an application for a Registration Permit for a medium volume transfer station that could accept up to 100 tons per day of solid waste and may operate 24 hours per day, 7-days per week. The application package contained a completed registration permit application form, a facility plan, a notification letter to City Planning and a statement that no meetings were required for this project.

The LEA found that the application package meets the filing requirements pursuant to Section 18104.1 of Title 14 of the California Code of Regulations. The registration permit is a non-discretionary permit and does not require the applicant to submit evidence of CEQA compliance. Therefore, the LEA has issued a Registration Permit on May 28, 2021 to First Stop Recycling to operate a medium volume transfer station.
