DEPARTMENT OF BUILDING AND SAFETY

ePlanLA Expanded to Accept All Plan Check Project Types

The City of Los Angeles Department of Building and Safety has expanded its electronic plan review system known as ePlanLA (<https://eplanla.lacity.org>) to accept all plan check project types. ePlanLA is an online service for submitting plans for plan check, applying for permits, and tracking the progress of these applications.

For customers who previously registered for online services, please create an [Angeleno Account](#) using the same email previously used to register with the Los Angeles Building & Safety Department. This will allow users full access to all previously applied-for permits and services.

As the LADBS pursues new ways to enhance customer service, and improve the efficiency of the permitting process we thank you for being a valued customer. We look forward to continuing to meet your needs.
